The performance data quoted represents past performance. Past performance is not a guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Performance may be lower or higher than performance data quoted. Please call 800.826.2333 or visit vaneck.com for performance current to the most recent month ended.

The "Net Asset Value" (NAV) of a Fund is determined at the close of each business day, and represents the dollar value of one share of the fund; it is calculated by taking the total assets of the fund, subtracting total liabilities, and dividing by the total number of shares outstanding. The NAV is not necessarily the same as the ETF's intraday trading value. Investors should not expect to buy or sell shares at NAV.

Fundamentals*

Spread Duration (yrs)	3.90
Years to Maturity	9.82

*These figures represent weighted averages.

Spread Duration measures a bond's price sensitivity to a 100 basis point change to its option-adjusted spread. As the rate of the Treasury security in the option-adjusted spread increases, the rate of the option-adjusted spread also increases. Years to Maturity is the period of time for which a financial instrument remains outstanding.

Index returns are not Fund returns and do not reflect any management fees or brokerage expenses. Certain indices may take into account withholding taxes. Investors can not invest directly in the Index. Index returns assume that dividends have been reinvested.

An investment in the Fund may be subject to risks which include, but are not limited to, risks related to Collateralized Loan Obligations (CLO), debt securities, foreign currency, foreign securities, investment focus, newly-issued securities, extended settlement, affiliated fund investment, management and capital preservation, derivatives, currency management strategies, cash transactions, market, Sub-Adviser, operational, authorized participant concentration, no guarantee of active trading market, trading issues, fund shares trading, premium/discount, liquidity of fund shares, non-diversified, and seed investor risks, all of which may adversely affect the Fund. Investments in debt securities may expose the Fund to other risks, such as risks related to liquidity, interest rate, floating rate obligations, credit, call, extension, high yield securities, income, valuation, privately-issued securities, covenant lite loans, default of the underlying asset and CLO manager risks, all of which may impact the Fund's performance. Derivatives may involve certain costs and risks such as liquidity, interest rate, and the risk that a position could not be closed when most advantageous.

Investing involves substantial risk and high volatility, including possible loss of principal. Bonds and bond funds will decrease in value as interest rates rise. An investor should consider the investment objective, risks, charges and expenses of the Fund carefully before investing.
